

ABSTRACT OF THE DISCLOSURE**5 METHOD AND APPARATUS FOR REMOVING INFORMATION FROM A
SERVER**

10 A method and apparatus for managing confidential
information in a data processing system server.
Information is received from a plurality of users. The
information is stored on a server for many different uses
and in many different files and databases. A request is
received from the client to remove specific selected
15 information from the stored information for a user
within the set of users, wherein the selected information
is received in response to a transaction involving that
user. In response to receiving the request, the selected
information is removed from the stored information, thus
20 maintaining the privacy requests of that user.
